

ZOO INTERCHANGE NEWS

US 45 RESURFACING

In conjunction with the Zoo Interchange project, pavement resurfacing of US 45, from Burleigh Street to Good Hope Road, has begun.

The week of March 16, crews will have begun sawing and base patching operations on the northbound lanes between Burleigh Street and Silver Spring Drive. The work will occur overnight and will require nighttime lane restrictions. The following week, they will move to the southbound lanes of US 45, between Silver Spring Drive and Burleigh Street, to perform the same operations.

Please note that periodic full freeway and ramp closures will occur overnight on US 45, at Good Hope Road, throughout the course of the project.

As work progresses, additional updates will be provided.

The project is slated for completion Fall 2015.

WHAT TO EXPECT DURING CONSTRUCTION

Some construction activities are likely to create noise and/or dust, and some work may be conducted at night during the course of the project. Be assured that we will continue to work hard to minimize the impact of these events, but, if you have a concern, please do not hesitate to contact us. The project team appreciates your patience during this period of intense construction in your area.
